

FIRST AID FOR FOOD CHOKING

Victim Cannot Cough, Speak, or Breathe

Rescuer must act quickly. Choking is a life threatening condition. Call 911 immediately.

1

GIVE 5 BACK BLOWS

Back blows: stand behind the victim and place arm across their chest for support; bend the victim slightly at the waist; firmly strike the victim between shoulder blades with the heel of your hand.

Adult:

Child:

Infant:

2

GIVE 5 ABDOMINAL THRUSTS

Abdominal thrusts: stand behind the victim and wrap your arms around the victim's waist; place your fist thumb-side in against victim's abdomen below rib cage, slightly above the navel; grasp your fist with the other hand; press your fist forcefully with quick upward thrust into the victim's abdomen.

Adult:

Child:

Infant:

TIP: For infants, support the head and neck securely. Keep the head lower than the chest. Use two fingers in center of chest for thrusts.

NEXT STEPS

- Repeat steps 1 and 2 until the object is forced out, the person can cough forcefully or breathe, or the person becomes unconscious.
- If the person becomes unconscious, begin CPR starting with chest compressions. Each time you open the airway, look in the airway and remove the object if you see it.
